Flutter Application Development

Test1

1. Create new Flutter project with name test_your_name in documents folder

2. Create assets folder with 4 folder's inside

   - icon
   - images
   - gif
   - audios

3. Add at least one file in each folder
4. Now add these folders into pubspec.yaml file
5. Show one image in main dart file using Image.asset
6. Run the project on chrome browser.
